POST ROCK CATTLE COMPANY

Dear Fellow Cattle Producers:

Welcome to this year's edition of the Cowman's Kind Bull and Female Sale. 2021 proved to be a year of transition and reinvigoration at Post Rock. Most of you know that my dad passed in 2020 and long-time ranch employee, Jeff, died on the job in January of 2021. While talks of succession and transition have been regular conversations within our family, we, like most, were reluctant to get started, let alone finalized with those plans. However, within 90 days and countless family and professional meetings and with both my mom's and children's blessings, Jan and I couldn't be more excited about the future of Post Rock Cattle Company and our operation. My nephew, Kyle Cavalli, joined our operation in March and he along with son-in-law, Will, at a later date will transition to full partners. Kyle's strength and passion is the cattle while Will's is on the agronomy side. Many of you met Kyle when he delivered bulls last spring and if you haven't, please make it a point to do so. The presence and new ideas of Kyle and Will have done much to invigorate and excite me and we look forward to another lifetime in the seed-stock business.

Informed buying decisions become more and more important every day. Every bull selling will have current GENOMIC ENHANCED EPDs as of the catalog print deadline. Every bull has been DNA tested or known by birthright about being homozygous polled or homozygous black. In addition, every bull selling has been DNA sire verified, and any bull that had potential to have any known genetic defects from Angus has been DNA tested free. Finally, every bull selling has been ultrasounded for ribeye area (REA), intramuscular fat (IMF, marbling) to aid in your sire selections. DNA testing and ultrasound collection are a major expense of both money and time commitment, but we feel they are necessary to positively impact buyers' decisions and profitability while giving us future insight into genetic matings.

This year's sale offering is extremely strong. The bulls are a tremendous group and are loaded from top to bottom in both the Purebred and Balancer divisions. We are offering many new AI sire groups to choose from, and some of our most proven genetics sell in volume sire groups. Many of the cows who produced this bull crop have multiple generations of AI and ET matings stacked to produce the highest herd sires available. Over 600 cows and many AI and ET matings were used to produce the bulls selling this year, and the sale offering reflects that level of culling and commitment. Additionally, we feel the 6-year-old and the 2-year-old females are an extremely strong group as well. Many of the elite, proven donors of the breed are the dams or the granddams of several females selling. We are proud of each and every bull and female selling, and each animal is expected to have a positive impact on their new owner's herd.

As in the past, we have bulls from our cooperator herds: Meadowlark Gelbvieh, Dawson Creek Gelbvieh, Twin Oak Gelbvieh, and Stucky Beef Genetics. Our cooperator herds allow us to increase selection pressure placed on the bulls and make it possible for us to offer more and better bulls. We share in the income from these bulls, and they are represented and guaranteed just like our bulls. Should a problem arise, you will deal with Post Rock.

We hope to assist you in increasing your profitability, as our survival in the seedstock business is based on it. We have learned from experience that, unfortunately, we cannot spend enough time with each of you on sale day. We encourage you to call or visit at any time prior to the sale. We look forward to seeing you February 26 at the sale.

Sincerely,
Leland Clark

"Where calving ease, performance and eye-appeal come together."

3041 E. Hwy. 284, Barnard, KS 67418 • Fax: 785.792.6250 • Email: prcc@twinvalley.net

DIRECTIONS TO POST ROCK CATTLE CO.

When coming from the west, exit K14 onto K284. Go east 6 miles to Barnard. Then, go east on county blacktop 4 miles, south 1 mile and, then, east 1.5 miles.

When coming from the north on US 81, exit west K41. Then, south on N 120th Road. When coming from the south on US 81, exit midway between mile marker 173 and 174. Then, go west to N 120th Road. Turn and go north on N 120th Road. From N 120th Road, turn west on Mulberry Road, 10 miles to Ada. Continue west on the blacktop. Note as you go west on Mulberry Road it changes names each time you turn a corner, but stay on the blacktop until you get to Post Rock Cattle Co.

If you will be using GPS directions please type in 3041 E Vine Street, Barnard Kansas Our GPS and mail address is not the same.

FOOD & REFRESHMENTS

Join us on Friday night for our annual hamburger fry and lunch will be served on sale day with refreshments available all day.

SALE DAY SUPPLEMENT SHEET

Actual scrotal measurements and updated calving will be available sale day.

SALE OFFERING VIDEOS

Visit www.postrockcattle.com and www.mms.bz to view the sale offering videos available on the bulls and females selling.

ONLINE INTERNET BIDDING

Visit www.dvauction.com to register and bid live online. Buyers must pre-register to bid online.

DVAuction
Broadcasting Real-Time Auctions

TELECONFERENCE LINE

Teleconference line will be available sale day. Call Post Rock to get conference line number, pin number and get a buyer number.

SALE HEADQUARTERS

Salina is 45 miles from the ranch and is served by most major motel chains. If you need help with accommodations, please call Post Rock Cattle Company.

SEMEN INTEREST

RETAINING 1/3 SEMEN INTEREST IN ALL BULLS SELLING UNLESS OTHERWISE NOTED. Buyer will take 100% possession, 100% salvage value. Semen collection, if we elect to do so, will be at our expense and your convenience during the off breeding season. Should the buyer elect to collect semen on bulls, the expense and semen collected will be 100% of the buyer. At a later date, by mutual agreement, if semen sales are a possibility the mutually agreed on expenses and revenue will be split 1/3 Post Rock and 2/3 new buyer.

ULTRASOUND

Ultrasound data was collected on all bulls selling January 7, 2022. Be sure to compare only within contemporary groups for example Fall born purebreds to Fall born Purebreds. This is covered in Detail in the ABOUT THE SALE CATTLE PAGE.

GENOMIC ENHANCED EPDS

ALL BULLS selling have genomic enhanced EPDs and are sire verified.

HOMO BLACK HOMO POLLED

All bulls except those known by birthright have been tested for homozygous black and homozygous polled, and are denoted in the sale book.

SALE FORMAT

2022 sale will be held as a video auction at the sale barn at Post Rock Cattle Company.

SPRING CALVING INFORMATION

Spring calving information will be updated February 15 and February 24 on www.postrockcattle.com and www.mms.bz or you may call the office.

Blountstown, FL 32424

TERMS & CONDITIONS

Terms

The terms of the sale are cash. Animals are to be paid for during or immediately following the sale. Each animal will be sold to the highest bidder. We have made every effort to provide as complete and accurate information as possible. However, announcements from the auction stand will take precedence over information printed in the catalog.

Bidding

Any disputes or challenges regarding bids shall be settled by the auctioneer, and his decision shall be final. Mail or telephone bids will be handled with strictest of confidence.

Semen Check & Guarantee

Each bull is guaranteed to settle healthy, fertile females and has been semen tested. Should any bull be claimed a non-breeder, the recommendation of the American Gelbvieh Association will apply. However, this does not preclude us from making adjustments that are mutually beneficial to both parties.

First Breeding Season Guarantee

- If any bull purchased in the Cowman's Kind Sale or privately from Post Rock is disabled during the first 90 days following first turn out of a young bull, the following guarantee will apply.
- If your young bull is temporarily unable to complete the breeding season, if possible, Post Rock will provide you with a loaner bull without cost to you other than transportation of the bull from and back to Post Rock.
- If your bull becomes permanently disabled, Post Rock will allow full credit (\$5000 Maximum) toward the purchase of one bull in the next Post Rock sale. Post Rock will receive the salvage value of the injured bull. Should the bull you purchase cost more than your credit you pay the difference. If he costs less, no further credit is due to you.
- The above warranty is for bulls used in a single sire breeding pasture. If two or more bulls are used in a breeding pasture the warrant is reduced to 50% of the initial purchase cost.
- If you have a problem, please notify us as soon as possible since we try to keep a few bulls available in case your new Post Rock bull is disabled during the first breeding season.

Liability

All persons attending the Cowman's Kind Sale do so at their own risk. The sale sponsors, sale manager and/or any other seller assumes no liability for accidents, theft or damages done during this event on site of Post Rock Cattle Company.

Trich Testing

Many states have new rules for Trich testing and none of the sale bulls have been tested. Should a Trich Test be required Post Rock will pay costs involved and complete the testing requirements soon following the sale.

Female Lots

Please make arrangements to pickup all female lots within one week of the sale date. If you want Post Rock to deliver female lots delivery prices will apply. Up to 100 miles \$75.00 per lot, 101 to 300 miles \$125.00 per lot, 301 to 500 miles \$200 per lot and over 501 miles \$250.00 per lot. Cattle will be trucked by a commercial carrier.

BULL Free Delivery or Free Care Until May 1

You may select your choice of the following delivery options for your bull purchases:

- Option 1-Haul your bull sale day and we will deduct \$100 per bull. We will assist you in loading out immediately following the sale.
- Option 2-We will care for your bulls free of charge but at the purchaser's risk and you pick them up any time prior to May 1. Bulls remaining at Post Rock after May 1 will be charged \$2.50 per head per day.
- Option 3-We will deliver bulls free of charge up to 300 miles with additional miles prorated per head and that cost will not exceed \$250 per lot. Purchases totaling \$20,000 or more will be delivered free of charge to an individual ranch or to a central location within your state on group purchases. For animals that we deliver you are encouraged purchase individual animal insurance that will be available sale day at the rate of 4% of the purchase price for 6 months coverage. Other rates apply for longer or shorter insured periods. Inquire at the clerks table.

Registration Certificates

Registration certificates will be transferred on all sale lots at the seller's expense, except for those marked as unregistered or announced otherwise.

Sight Unseen Purchases

If you are unable to attend the sale, a bull can be purchased for you on order during the auction. Please call either Leland Clark, Kyle Cavalli or Chris Mitchell in advance of the sale and discuss with us the price range and the type of bull you are looking for, and we will recommend the bull or bulls that will fit your needs. If you don't like the bull when he is delivered to your place, he's not yours; and the money paid will be refunded. If the bull can be purchased for less than your maximum bid, you get the bull for the amount he left the ring at, just as if you were bidding for yourself. Each year, breeders take advantage of this free service. Call if you would like more information or a reference. *For sight unseen satisfaction guarantees, you must purchase an animal that either Leland Clark, Kyle Cavalli or Chris Mitchell have previously recommended to fit your needs.*

Mortality Insurance

Insurance will be available on sale day at the rate of 4% of the purchase price for 6 months coverage. Other rates apply for longer or shorter insured periods. Inquire at the clerks' table.

TELE-AUCTION AVAILABLE

Post Rock is located in a very poor cell phone reception area and we encourage you to utilize this service. If you will be unable to attend the sale, you can do your own bidding via a conference telephone hook up that will connect you to ringside for the sale. You will be able to listen to the sale in progress, talk directly to our ringside representative and bid. Buyers interested in the option should call the office prior to sale day at 785-792-6244. You will be given the phone number and pass code to join the tele-auction and assigned a bidder number with which to do your bidding. Your only cost will be your normal long distance charges, charged by your long distance carrier. This would work well if you have looked at the sale offering prior to sale day and for sight unseen purchases.

ABOUT THE SALE CATTLE

FALL BULLS

The fall bulls were weaned May 27 after being raised on their dams on milo stocks or native pasture with sorghum silage, DDG, and ammoniated wheat straw and received no creep feed. After weaning, the bulls were raised on a rotational grazing system on sedan grass and were fed hand fed 8 pounds of growing ration per day. Late September, they were switched to a ration of silage, wet distillers, 1 lb. of corn per 100 lbs. of body weight, ammoniated wheat straw, and grinding-quality alfalfa hay.

SPRING BULLS

Spring bulls were raised on their dams on native pasture and received no creep. They were weaned September 9 and were placed on a gain test on 10/2/21 through 1/7/22 on a ration of sorghum silage, wet distillers, 1 lb. of corn per 100 lbs. of body weight, ammoniated wheat straw, grinding quality alfalfa hay, and a vitamin mineral pack on a ration designed for 3.25 pounds of gain per day.

ULTRASOUND

All bulls selling were ultrasound-measured on 1/7/2022. The spring bulls were ratio'd in as large of contemporary groups as possible for the purebred and balancer groups. However, bulls from time to time were not in a contemporary group and therefore don't have a ratio—only an actual measurement. This data was collected by a CUP certified technician, and all data was submitted to the AGA. The fall bulls were too old for data submission, and all data is actual measurements collected by the same certified technician but was a chute side reading only.

The fall purebred and Balancer group were ratio'd against each other. This would include ET bulls and all bulls from all co-operators as they have all been handled the same for over 6 months. As with all raw data, comparisons must be made only within and not between contemporary groups. As an example, compare only spring Balancers to spring Balancers and spring purebreds to spring purebreds. You'll notice a large difference between the fall bulls data & the spring bull data even though many of the same sires are represented in both groups. This was due to the way the bulls were developed and the timing of the ultrasound measurements. Most of the fall bulls were over 365 days old and were adjusted back with decreased rib eye

size considerably while the spring bulls were more typically measured at 11 months of age with a small adjustment up to 1 year of age. If you've followed our program you'll realize in the past 5 to 7 years we have greatly increased our selection pressure on marbling both from an EPD sire selection stand point as well as actual measurements. You'll find many bulls with top 10 to 25% marbling genetics with the data to back it up without sacrificing our 30 plus year goal of "WHERE CALVING EASE, PERFORMANCE AND EYE APPEAL COME TOGETHER."

SALE COWS

As in the past, our sale group of females includes all our sound six year olds and approximately 10 two year old heifers, most with calves at side. This year's sale group is really strong and includes more top-end cows and is from top to bottom our strongest, most consistent group to date. In addition, there are more cows that every ranch needs more of. Cows that get bred every year bring in a calf in the top half of their contemporary group and have high quality udders and the added look and eye appeal we demand.

The two year old sale heifers are selected as a cross-section of our two year olds. Any cow that has at least two daughters in the herd that has an additional daughter is available as a sale heifer as well as any heifer that we have a large number of from their cow family and sire group. These two year olds are handled exactly like the heifers we retained and haven't received any additional supplementation to fatten them up for the sale. We feed no grain to our heifers after weaning—only ammoniated wheat straw, sorghum silage, wet distillers, and grinding quality alfalfa hay. Three weeks prior to AI, as virgin heifers, they receive 2 lbs. of corn for fleshing them up for AI breeding, and this is the only grain they ever receive during their development.

All females bred or exposed greater than 100 days have been pregnancy checked and expected to calve consistent with their respective breeding dates or pasture exposure listed in the catalog. The fall calving cows selling with calf at side have been pasture exposed since calving but sell only as exposed but not guaranteed safe in calf.

DEFINITIONS FOR DATA IN SALE BOOK

INFORMATION ABOUT THE BULLS

Our catalog contains a great deal of information, weights and measurements. To clarify the information, please remember that all Scrotal Measurements are actual measurements. Birth Weights are actual weights taken at birth. Weaning and yearling weights are adjusted to 205 days and 365 days respectively.

BW	=	Actual Birth Weight
WW	=	Adjusted Weaning Weight
YW	=	Adjusted Yearling Weight
REA	=	Ultrasound Rib Eye Area, adjusted or actual as noted
IMF	=	Ultrasound Intramuscular Fat, adjusted or actual as noted
FAT	=	Ultrasound Rib Fat, adjusted or actual as noted

EPDs IN THE SALE BOOK

CED	=	EPD for Calving Ease Direct	CEM	=	EPD for Calving Ease Maternal
BW	=	EPD for Birth Weight	YG	=	EPD for Yield Grade
WW	=	EPD for Weaning Weight	CW	=	EPD for Carcass Weight
YW	=	EPD for Yearling Weight	REA	=	EPD for Rib Eye Area
MK	=	EPD for Milk	MB	=	EPD for Marbling
TM	=	EPD for Total Maternal	FPI	=	Feeder Profit Index

Genomic EPDs: All bulls selling have been DNA tested with Genomic EPDs listed in the book.

\$Cow: Represents the genetic value in dollars of profit of an animal when retained as a replacement female relative to other animals in the herd. A higher number represents more profitable genetics for maternal productivity. \$Cow will serve producers in selecting bulls that will sire daughters with stayability and reproductive efficiency as well as other traits that lead to profitability in a production system, such as milk, calving ease, moderate mature weight and the ability of calves to gain. A female's genetics also influence the performance of her calves in the feedlot and at slaughter, so traits such as feed efficiency and carcass value are also included in \$Cow.

Feeder Profit Index (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

Efficiency profit index (EPI): An economic selection index developed to aid producers in selecting for more feed efficient cattle that still have acceptable amounts of gain. The EPI provides slight negative pressure on intake, while keeping gain at a constant value. By selecting on this index, producers will be able to find those animals that gain the same amount as their contemporaries while eating less.

- Really proud of this bull and the breeding value he brings to the table. This was our alternate Breeders' Choice Futurity bull and he drummed up a good bit of interest despite not being in the book
- Take note of the way he's bred and his strength of EPDs and actual data
- Outstanding ultrasound data that doesn't ratio because he's an ET bull, but if it did it would be off the charts for both REA and IMF on a purebred
- At weaning time this was our favorite. For a time, he slipped back a little but he's coming on strong now and may be the pick bull again. He's a legit big time herd bull

Genomic Enhanced EPDs

- AI Sired by the ABS sire Armstrong that really puts the beef in his calves
- Sells with Hybrid papers rather than Balancer papers but he has Genomic enhanced EPDs and is sire verified just like every other bull in the sale
- His EPDs should be disregarded since he doesn't have any input from his dam in the tabulation
- Way too good of bull with strong individual data to cut so take advantage of our mistake on his dam

For those wishing to come in advance and view the bulls, they are located ¼ mile east and ½ north up the private drive and are in the pens listed below. Pen numbers are located on top of the gates and at the middle of the feed bunk. I would appreciate first-time visitors or customers to give me a call, and I will be glad to show you the bulls on a personal basis. As in the past, many repeat customers may view the bulls at their convenience. The bulls will be moved to the sale location on February 24 and the penning sheet will be available in the office.

BALANCER®

Gelbvieh x Angus or Red Angus

ADDING THE POUNDS

Steers in the 2018 AGA Scale and Rail Contest had an average daily gain of 4 lbs. per day in the feedyard.

MAKING THE GRADE

Many feeders have reported Balancer-sired cattle that grade 90% Choice or better.

DELIVERING THE VALUE

Gelbvieh ranks #1 for percent retail product according to U.S. Meat Animal Research Center progress report #22.

PROVIDING VALUE ON THE RAIL

Carcass data from 302 head of 2016-born Balancer steer and heifer calves fed in Amherst, Nebraska, and harvested at Tyson Fresh Meats in Lexington, Nebraska, prove Balancer cattle are the smart choice for feedyard profitability. These Balancer-influenced calves averaged 93% yield grade 1, 2, or 3, and 98% Choice and Prime quality grade.

“These Balancers are one of the best kept secrets in the cattle industry.”

-Adam Sindt, Riverview Farms, south-central Neb.

A product of our ET program out of the noted 294Z8 donor that's done so much for our program. We are big fans of her sire, Gravity, and also keep in mind he's the sire of our Young Gun bull who was the big winner in this year's AGF "Scale and Rail" contest siring both the Champion Carcass value steer of the entire contest as well as the Grand Champion overall Pen of Balancer Steers which marks only the second time that's been done in contest history with the first being Game Changer which is another of our resident Herd sires. Really good cow. Look her up.

ET daughter of the Twila 245W2 donor and a flush sister to lots 132 and 133. All have been outstanding cows in our program. Her daughter by TOP Gun is in the extreme top end of the bred heifers calving this year. Whenever we have an outstanding ET flush of females you always get the inevitable question as to which is the best. I'm being 100% transparent when I say I don't know but all are big time good.

Purebred ET daughter of the featured donor 245W2 out of the popular Traction bull. This cow has always been a pasture favorite and is a near replica of both her dam 245W2 and Grand dam the legendary 223M2 donor. Take note of her standout fall calf at side. I would not be at all surprised to see this cow joining many others females who have come through this sale and ended up in a donor program. Really good cow - look her up.

Homo polled by birthright but never tested for black. Purebred that can raise an absolute stud of a herd bull. Need proof? Look up lot 91 who has been a standout since day 1 in this year's sale group. She has a 365 day calving interval and a 105WW ratio on her progeny and may prove to be the buy of the sale regardless of price given her genetic strength and ability to raise an absolute great one. Also note both her dam and granddam ended up in donor programs after being purchased in this sale and 169D8 deserves to be a donor as well.

Royally bred and the Post Rock program wrapped up in eye appealing package. I usually don't write long s on these first calf heifers since we don't have progeny or much data to highlight. However, be aware that in both the spring and fall group we select heifers from cows or cow families with more than one daughter in our herd. This offers a cross section and some of our top heifers which just need found by the buyers.

This is a heck of a good production cow who's only son sold for \$1750 above the sale average and all 3 daughters have been retained. She's equally impressive in the flesh. Whenever you check pastures or have visitors you never leave the pasture until you see 218D8's calf because they have always risen to the top of the group and are so easy going and inquisitive. Really good cow I'm going to miss.

Wilma 10H is a homozygous black, homozygous polled fall bred heifer who nursed a 10-year-old full-sib to a bull futurity runner-up here at Dawson Creek. 10H's sire put his first three sons through the bull sale last year and averaged over \$6,000 per and he will have another strong group this spring! Our confidence is high in these fall bred heifers.

Sells AI'd to EGL Lifeline B101 (AMGV1298079) on 11/19/2021; Pasture-exposed to BDCG X56H (AMGV1502250), black Top Producer son hailing from the Reba cow family, from 12/21/2021 to 2/15/2022.

DC 147H7 is a homozygous black, homozygous polled fall bred heifer who hails from a Dam of Merit cow family. Her dam, 147Y, is an eleven-year-old purebred cow who has been a standout at Dawson Creek, and she is raising another knockout heifer this year in 2022! DC 147H7 exhibits tremendous growth with WW and YW EPDs in the top 20% of the breed and Milk and Total Maternal EPDs in the top 4% of the breed. Confidently buy females from no-miss cows!

Sells AI'd to JRI Probity 254D28 (AMGV1351990) on 12/15/2021; Pasture-exposed to BDCG X56H (AMGV1502250), black Top Producer son hailing from the Reba cow family, from 12/21/2021 to 2/15/2022.

Stuckys Hazel 025TBH Dbl Polled Dbl Black 55% Balancer
 Stuckys Hazel 025TBH is an own daughter of our recently deceased herd sire TTTT Mighty Hot 1450B. A group of TTTT Mighty Hot steers won Reserve Champion Pen of Steers in the 2021 Scale to Rail contest. Lending credibility that Stuckys Hazel 025TBH has carcass value as well as great pedigree and phenotype. Her dam comes from greatness as she is by our previous herd sire Post Rock Collateral 2ET who was a son of Post Rock Twila 223M2.

Probity was the very popular 2017 People's Choice Balancer Futurity Champion and has turned out to be even more impressive as a breeding bull. He sired the 2020 People's Choice Balancer Futurity and National Champion, Rebel Yell. Throughout the seedstock industry, many sales had featured sire groups that were Probity sons of which several were sale top-pers. His daughters at Post Rock and wherever we viewed them are equally impressive. We purchased full possession and half semen interest in the spring of 2020 from our good friend, Gary Carlisle. We have used him heavily in our Balancer program on Game Changer C136 and Young Gun daughters. His sire, Payweight 1682, has proven to be a landmark sire in the Angus breed, and Probity is the best breeding son of Payweight in the Balancer breed. Note his exceptional and proven EPD strength. His sons and daughters are highly recommend and will be large and important sire groups for many years.

Game Changer proved to be the big winner in the 2019 Gelbvieh Foundation Scale and Rail Contest. Game Changer sired the high individual in the average daily gain, the high individual in the carcass value portion of the contest, and was also the overall winner in the sire group award, which marks the first time any single bull has swept all three contests. He has developed into a most impressive sire that combines the actual data, elite EPD profile, pedigree strength, and unmatched phenotype that makes him a game changing sire. Game Changer will have a large and impressive sire group that you'll enjoy sorting through. They are awesome. His first daughters come into production this spring, and we're looking forward to the results.

Post Rock Top Gun is one of the all-time best bulls ever produced in our program. He was a phenotypic standout at an early age and has developed into a most impressive herd sire who's perfect in his feet and leg structure and has great depth and mass in an eye appealing design. His EPD profile reflects our 30+ year commitment to calving ease, performance, maternal and marbling. His sons are equally impressive in the flesh. We use him on our purebred 94% and higher females to make purebreds with few equals and on our females who are less than 30% to increase our Gelbvieh percentage back closer to the 50% level. His sons are beef bulls with few equals. Be sure and look them over.

Young Gun will have another exciting sire group this year. Young Gun was the 2017 Reserve National Champion Balancer Bull in Denver and is proving to be an equally impressive breeding bull. His AGA calf crop data of 99 BW, 100 WW, 99 REA, 99 IMF, indicates he's a low-birth, high-growth bull; and our eyes tell us that they have his eye appeal, rib shape, muscle, and structural correctness to go with his impressive data. Look over this sire group. They're extremely strong and uniform and have some elite herdsire prospects selling. His first daughters came into production in 2019, and we feel that they may be his strongest asset. They are marvelous females.

In a Data driven world C136 has few equals. We purchased this Angus sired Discovery son out of the performance strong Thorstentson herd in South Dakota as the high selling high ratioing bull in the 2016 sale. C136 Posted a 97 BW ratio against 132 contemporaries a 123 WW ratio and was ranked #1 against 114 herd mates and 117 YW ratio also ranking #1 against 80 herd mates all in a low 6 frame size. On ultrasound he posted a 104 REA ratio and a 113 IMF ratio against 75 herd mates. His dam posted an impressive 102 BW 111 WW 106 YW ratio's on 6 calves and is a Dam of Merit. His granddam has a 98 BW 104 WW 98 YW ratio's on 7 calves and has also been awarded a Dam of Merit. His great granddam has a 83 BW 105 WW 101 YW ratio's on 9 calves and is an AGA Dam of Distinction. In his initial calf crop C136 has a 94 BW ratio 101 WW 102 YW 100 REA and 121 IMF ratios. He has as strong of curve bending EPD profile as you can write and has as large contemporary group data base generations deep to back it up. Look over his sons selling they jump out at you in person and on paper and are new and exciting sire group.

Cowman's Kind SALE NOTES

A black and white photograph of a rural landscape. In the foreground, a barbed wire fence runs horizontally across the frame, supported by several weathered wooden posts. The fence is slightly out of focus. Behind the fence is a field of tall, dry grass. In the distance, a flat horizon line separates the land from a sky filled with soft, white clouds. The overall tone is quiet and desolate.
